

A variety of customized solutions have made it a good year for Q-Interline

This year, Q-Interline has made many different solutions for our customers. The solutions range from software upgrades over mass spectroscopy to complex online systems and include equipment such as FT-NIR analysers, gas analysers, probes etc. We want to thank you all for your trust – it is a privilege to cooperate with you.

Application Notes

The list of applications for our analysers is long. With the launch of the Quant FT-NIR Analyser, we have made a bunch of new application notes for applications such as forage, oils and fats and soil.

The soil application note is based on the FT-NIR Quant analyser and has been worked out in cooperation with the Dutch

central laboratory Bgg. They run about 60,000 soil analyses every year, so they have a lot of experience.

Would you like to learn more? All application notes can be downloaded from our website q.interline.com.

The new Multipurpose Seed Analyser

The new Q-Interline multipurpose seed analyser can be used for traditional bulk grain/seed analysis and for single seed applications. The analyser features the following:

- Combined bulk and single seed capability
- Unique sampling solutions
- Cutting edge spectroscopy quality
- Easy to use and operate

New version 2.71 of FTSW100 software

The new version 2.71 of the process software FTSW100 offers all the advantages of v2.61, maintaining the same high reliability and stability along with many enhancements, e.g.:

- Significantly improved database management
- Automatic management of disk defragmentation
- Automatic system recovery in case of database corruption
- Improved spectral data
- New flexible and integrated report generator
- Added functionality to dialog boxes

With the release of the new version v2.71 we also announce end of life of FTSW100 v.2.10 and older process software.

Get a brochure on q-interline.com or contact Per Sand for further information:

▶ Have you upgraded your InfraQuant to version 2.3?

The InfraQuant software is equally important as the analytical equipment. Therefore, Q-Interline is continuously working to improve the InfraQuant software to give improved features and minimize issues encountered with previous versions.

Until 31 March 2010 we can offer you an upgrade at very favourable conditions.

Please contact Per Sand for more information:
psa@q-interline.com / +45 4674 4200.

This year, we have decided to contribute to the organization Families with kids suffering from cancer instead of sending Christmas cards

We wish you a Merry
Christmas and a
Happy New Year

Help the environment

You can help the environment by getting this newsletter by email instead of snail mail. Both paper, printing and transport is minimized. Sign up on our website q-interline.com – so we know that we have your permission.

Employee info

Kirsten Juda is the Accounting Manager of Q Interline. She is also involved in many other issues such as shipping and answering the telephone and is therefore known by most of our customers.

In her spare time, Kirsten is a very active sports-person. She plays tennis, roller skates and has been involved in orienteering for years.

Upcoming events

28-29 January

dsk.2010.konference – Chemometrics Conference in Nyborg, Denmark.

Read more: www.dsk2010.dk

15-16 April

Quantitative application of Soil Spectroscopy, Potsdam, Germany.

Spring

xPAT seminar – A new software solution for large companies. Denmark.

Spring

Courses: InfraQuant, Sampling, Hands-on Spectroscopy, Calibration and application development and FTSW100. Please contact Lone Vejgaard for detailed information: Lv@q-interline.com and +45 4674 4217.

Autumn

Courses: InfraQuant, Sampling, Hands-on Spectroscopy, Calibration and application development and FTSW100.

Please contact Lone Vejgaard for detailed information: Lv@q-interline.com and +45 4674 4217.

Calibration check of instruments

Do your calibration models need a quality check?

Then please contact Lone Vejgaard on email Lv@q-interline.com or telephone +45 4674 4217.
